

focus on dementia

Highland 8 Pillars' Rural test site Report- Out Conference 23rd August 2016

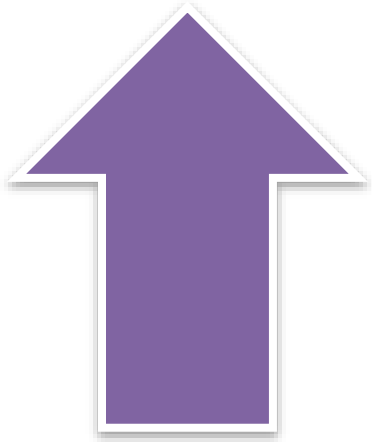

Douglas Philips on behalf of the
Focus on Dementia Programme

Improvements in safety, experience and care-co-ordination across the whole pathway

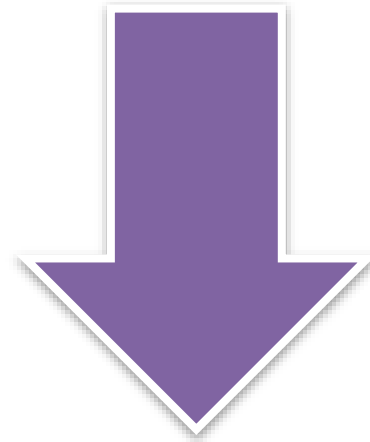

Focus on Dementia Aims

Improve Quality

- Experience
- Care quality
- Outcomes

Reduce
variation

Meeting the Target.....Missing the Point?

PDS Target being met but how do we know this is of high quality?

Create the vision

- Video Interviews with people with dementia, carers and staff about what high quality post diagnostic support looks like and the difference this makes.

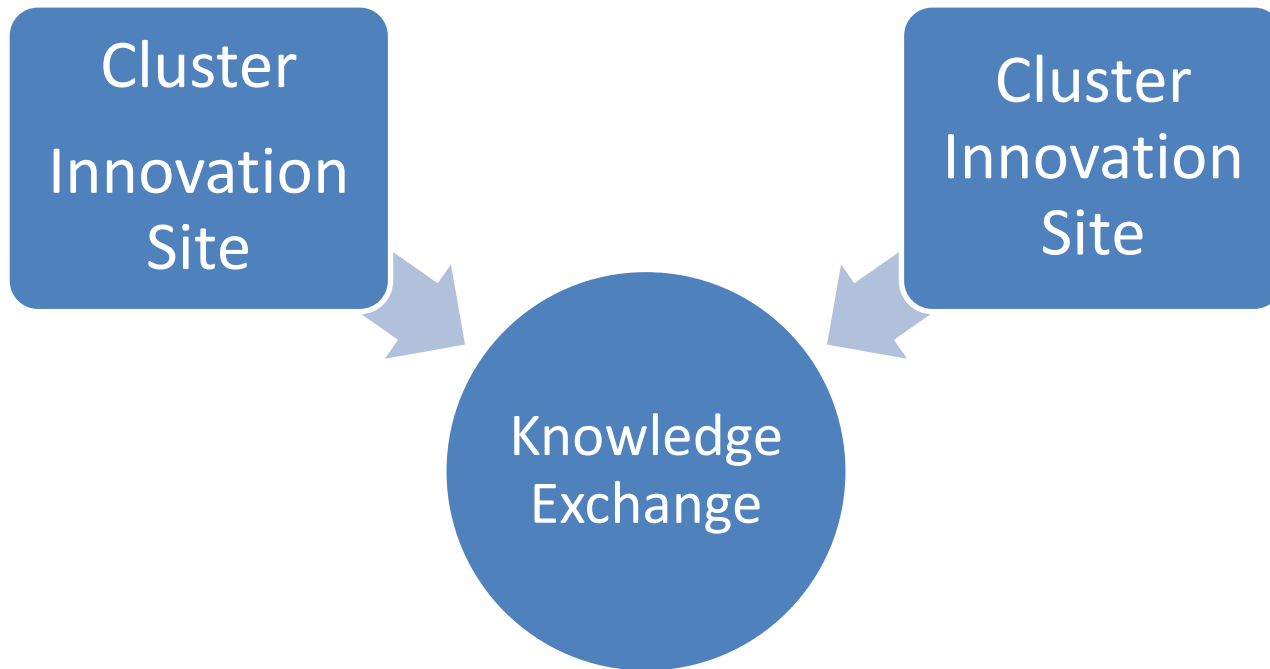

Reduce Variation

- Co-produce quality principles with people with dementia, staff and carers to support staff delivering post diagnostic support.
- Design a measurement framework which evidences high quality delivery

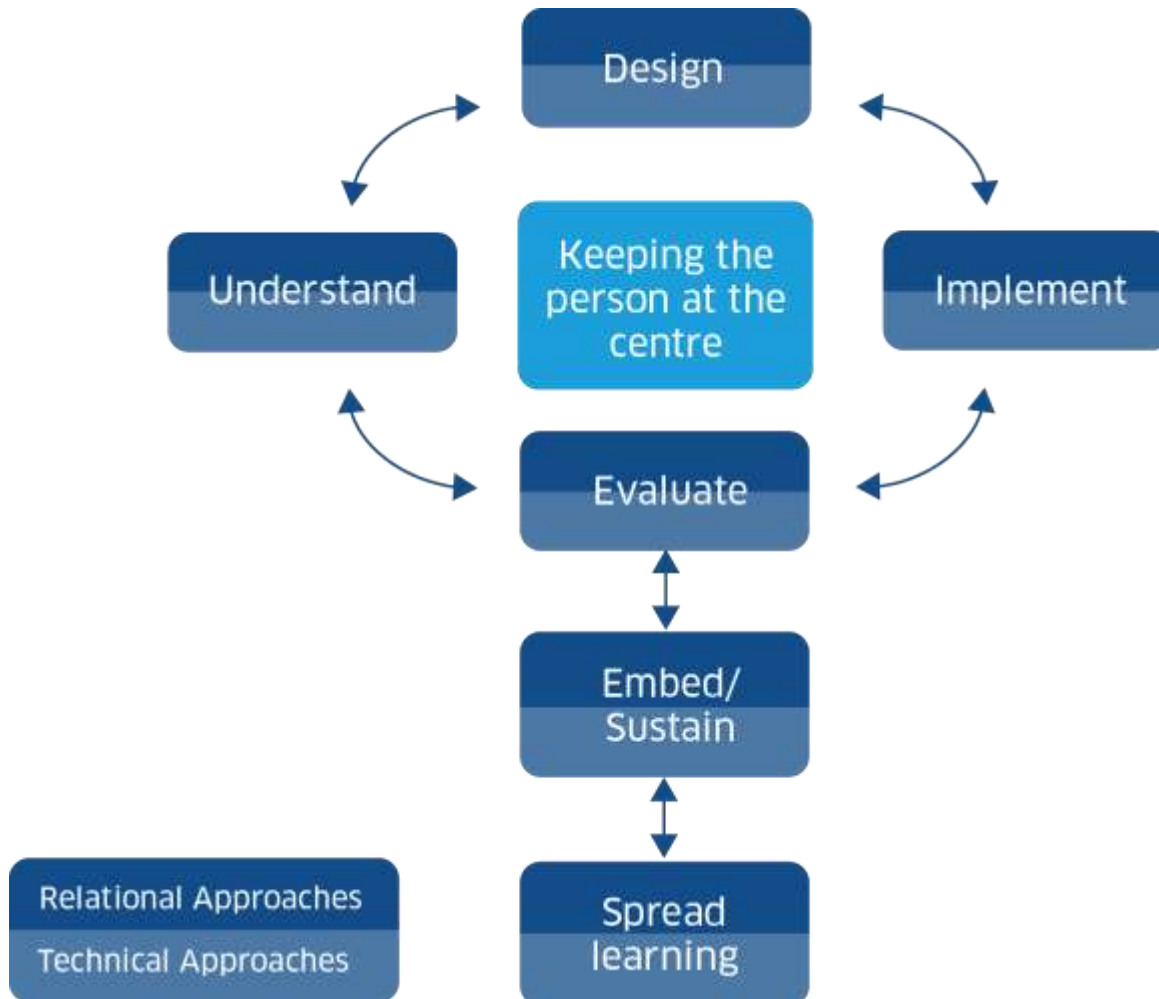

Support and Embed Improvements, Spread Learning

- Regional events to understand local context and support changes in practice
- Supporting local improvements and sharing at regional and national level

Shifting Context for Post Diagnostic Support to Primary Care

Our approach to supporting improvement

focus on dementia

Integrated Care

Improvement Collaborative to Test 8 Pillar Model

Final Learning Session: 15 August 2016

External Evaluation Report: September 2016

Spreading the learning

focus on dementia

Acute General Hospitals

Focus on Dementia

Supporting Improvements for people with dementia in acute care

Acute General Hospitals

Report sets out examples of good practice in supporting people with dementia in acute care.

Next steps:

Building on what works:

- Reducing Variation
- Embedding Work
- Spreading Good Practice
