a proactive approach to
supporting people in the
caring role and maintain
the carer's own health and
wellbeing.

Personalised support –
flexible and person-
centred services to
promote participation and
independence.

AIM

To improve the care for people with dementia by January 2016, through testing and evaluating a range of approaches to providing better integrated care and support using 8 pillars model.

Primary Drivers

Dementia Practice Co-ordinator

Therapeutic Interventions to tackle symptoms of the illness

General health care and treatment

Mental health care and treatment

Personalised Support

Support for Carers

Environment

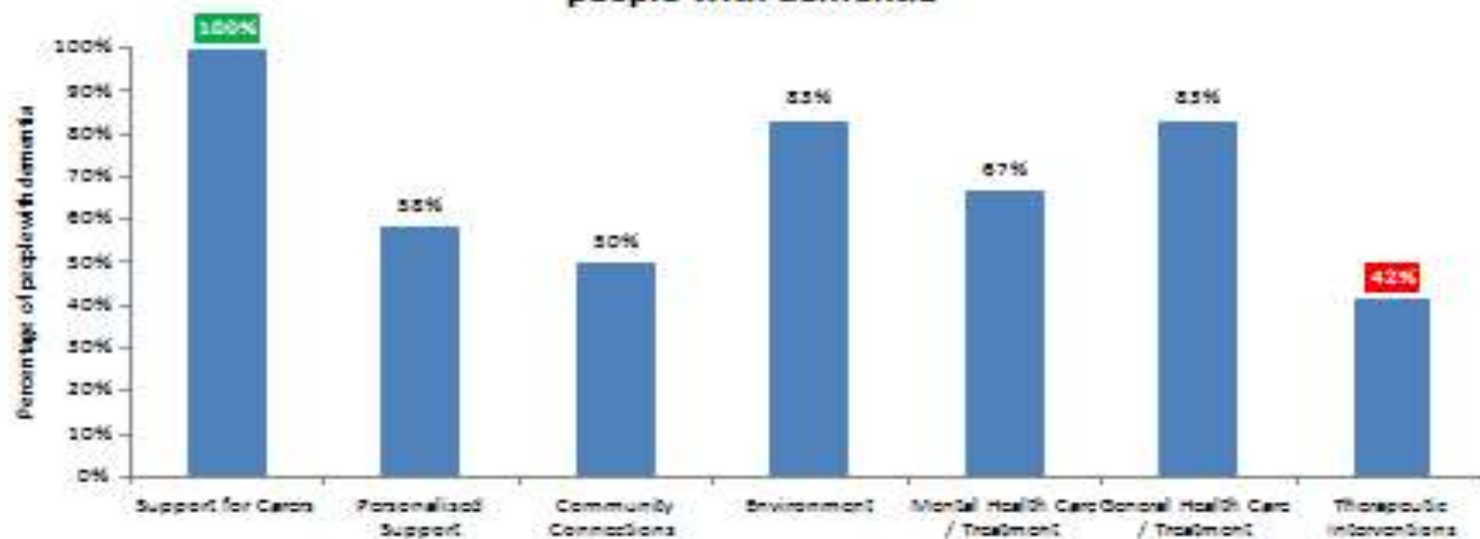

Community Connections

Secondary Driver

Interventions for carers will be delivered across health and social care disciplines. The DPC will identify the individual needs of the carer and link with the appropriate practitioner or service.

Functional Limitations	Behavioural Manifestation	Cognitive Impairment
Self-care	Sleep disturbance	Memory
Activities of daily living	Hallucinations	Language
Balance and gait	Physical aggression	Concentration
Motor skills	Depression	Judgement
Visuo-spatial difficulties	Disinhibited social behaviour	Confusion and Disorientation

Accessibility per pillar in percentage of people with dementia

KEEP CALM AND CARE....

- What to expect
- How to care
- Legal issues
- Nutrition and diet
- Falls and mobility
- Accessing respite
- Reliability and trust

Key Messages

- Carers often aren't professionals
- But sometimes they are
- We need to be proactive
- We need to be responsive
- We need to be knowledgeable
